Yesterday – Today and Tomorrow

1920 – Edward Handler, an early 1900’s emigrant from Germany, owned a small dental laboratory in Kearney, NJ. Ed designed new styles of denture flasks and less expensive denture presses.

1921 – Both the newly designed “Donham Flasks” and “Ideal Presses” were successful with the local labs. Ed found himself manufacturing the new flasks and presses at his dental lab in Kearney in addition to dentures. He added newer vulcanizers to his product line and continued to look for newer and better methods to build dentures and partials.

1923 – Ed Handler, along with two of his engineering friends decided to design and build a new two speed polishing motor, calling it a “Red Wing Lathe”. It was quiet yet powerful and stable.

1930’s – Ed Handler move his lab and manufacturing facilities to Kinney Street in Newark, NJ.

1946 – Edward Handler and Son decided to move to a larger 5,000 square foot manufacturing facility in Garwood, NJ. Ed Handler continued to innovate and manufacture new cast flasks for acrylic dentures, crown & bridge flasks, Red Wing lathes, chucks and vulcanizers. He later developed a new stand up polishing unit with suction for labs.

1957 – After more than 40 years in the dental business, Handler decided to sell his business to George DeCourcy who was previously VP and General Manager for two dental companies – Aderer Gold and Cosmos Acrylics. DeCourcy changed the name from Edward Handler and Son to Handler Manufacturing Co., Inc.

1963 – George DeCourcy continued in the family tradition of building durable and affordable dental lab equipment; marketing the products primarily in the New York area. In mid 1963, George hired his son-in-law and engineer, Bill Lehman. Handler’s business continued to innovate adding new products such as manual and automatic chucks, presses, drop forged flasks, polishing units and small dust collectors for various industries.

1963 – 1979 – Handler’s business expanded in North America and Internationally with the introduction of larger central dust collectors, a full line of metal laboratory Tech-Rite benches and cabinets and many new labor savings products for the dental, jewelry, podiatry and industrial trades.

1979 – Bill and Lorraine Lehman purchased the company from George DeCourcy and family. They continued creating and building new quality products for the dental and industrial trades – continuing in the tradition of a growing family business.

2001 – In 2001 a new family member entered the Handler business. Rick LaDuca joined Handler as President and General Manager. He brought with him the corporate world experience in research and development and product marketing. In 2004 he incorporated MRP/ERP computer system to streamline Handler’s business, improving quality, inventory control, new product design and improve quality. A new 2-stage curing unit was introduced along with a new Pro-Tech line of metal laboratory benches and cabinetry. New cartridge and HEPA style filtering systems to Handler’s dust collectors. These new products allowed the dentist and dental lab owner to increase work flow efficiency while holding costs down. Handler products are still made in the USA.

PRESENT – Today, Handler Manufacturing Co., Inc. is known world wide for building, durable and affordable products and continues to design and build over 90% of their product line in Westfield, New Jersey. Handler products are sold exclusively through authorized dealers and distributors worldwide. Our sales staff and customer service personnel continue to work closely with end users and their distributors to provide custom designed dental labs, suction systems and dental solutions for dentists and dental lab owners. Handler builds for the dental, jewelry, podiatry, audiological and industrial trades. Visit our website at www.handermfg.com for our full product line

...and if you don’t see it. Maybe HANDLER can make it.

NEW LAB EQUIPMENT

Hazardous Containment Device for the Lab
S.H.I.E.L.D. (Safety Hazard Intervention Environmental Low Cost Device)

Avenger Model 86A
Handler’s AVENGER is THE device that makes it efficient and easy to disinfect after EVERY polishing application, so you can be compliant.
Shipping Wgt.: 6 lbs. [2.7 kg]
Dimensions: 10" W x 15" D x 12" H [25cm x 38cm x 30cm]

550A UNDER BENCH PORTA-VAC DUST COLLECTOR
The 550A is a compact starter dust collector of sturdy steel construction with disposable HEPA filter designed for light duty dry grinding applications in the dental laboratory. The HEPA filter, 182 cubic inches of filter area collects 0.3 micron for a healthier, safer work environment. Powerful high velocity vacuum motor moves 125 CFM. The 550A comes standard with 6’ flexible hose that can be attached to a variety of suction inlets, and remote on/off control foot switch. Various suction inlets are available. Replacement disposable HEPA filter part number 62-IIDF.
Shipping Wgt.: 20 Lbs [9 kg]
Dimensions: 14 ½”L x 9 ¼”W x 11 ½”H [37cm x 23.5cm x 29cm]

62-IICC CAD/CAM MILLING DUST COLLECTOR
The latest innovation in dust collection for milling applications, especially suited for Zirconia and other milling materials. The 62-IICC is compact and lightweight. It includes a powerful vacuum suction motor; factory installed HEPA filter, charcoal filter, foot activation on/off switch and variable speed air flow control. The disposable HEPA filter has a volume capacity of approximately 182 cubic inches to mill hundreds of crowns before changing the bag. The HEPA filter is conveniently located in the front compartment for easy removal and disposal. Weighing in at only 35 pounds, the 62-IICC can be easily deployed, and is compatible with most bench top milling applications. Replacement disposable HEPA filter part number 62-IIDF.
Shipping Wgt.: 35 Lbs [16 Kg]
Unit Dimensions: 10” W x 15-1/2” D x 13” H [25cm x 39cm x 35.5cm]

2010DCU DENTURE CURING UNIT
A sophisticated curing unit featuring a 2-Stage curing unit with a digital control panel on which sequences of polymerizing times and temperatures can be programmed. Time intervals can be set between 0 and 999 minutes. The end temperatures at each plateau can be regulated between 32°F and 210°F (0°C and 99°C). Visual synoptic display of program status at all times. Easy to program a heating sequence for the water in the tank. Low maintenance and easy cleaning.
NEW LAB BENCHES AND CABINETS

241FLAM FLAMMABLE STORAGE CABINET
A 35” [90cm] wide cabinet for storage of flammable and combustible liquids, built of heavy gauge sheet steel with warning label for safety. Manual close doors with lock provide complete access to enclosed area. Cabinets and doors finished in standard WHITE powder-coated finish. YELLOW is optional. Single adjustable shelf is included along with venting instructions. OSHA compliant and designed in accordance with specifications set forth by the National Fire Protection Association.
Shipping Wgt.: 250 lbs. [113.6 kg]
Dimensions: 35” W x 22” D x 35 9/16” H [89cm x 56cm x 90cm]

241T TOOTH CABINET
A 35” [90cm] wide 16 drawer cabinet built of heavy gauge sheet steel with Resistop work surface. Shallow drawers provide the perfect compact way to organize tooth inventory and storage. Cabinet and drawers finished in an oven-cured, powder-coated finish. Shipped complete with 6” Backsplash, may be ordered with 6” Riser option at additional cost.
Shipping Wgt.: 320 lbs. [145.5 kg]
Dimensions: 35” W x 23 3/4” D x 36 3/4” H [89cm x 58cm x 92cm]

245TILT PLASTER STORAGE CABINET
This 18” [46cm] wide cabinet makes it convenient and ergonomic to store heavy plaster or stone. The 245TILT is built of heavy gauge sheet steel with Resistop work surface. The door opens and tilts out from the top allowing the user to easily dump up to 50 pounds of plaster or stone. Cabinet is finished in an oven-cured, powder-coated finish. Shipped complete with 6” Backsplash, may be ordered with 6” Riser option at additional cost. Multiple cabinets can be placed side by side for various types of plaster or stone storage.
Shipping Wgt.: 120 lbs. [54.5 kg]
Dimensions: 18” W x 23 3/4” D x 36 3/4” H [46cm x 58cm x 92cm]
Lathes & Motors

Red Wing Polishing Motors have been manufactured by Handler for over 90 years. While providing a variety of horsepower ratings and speeds for the technician, Red Wing motors are made in the U.S.A., ETL listed, and known the world over for quality, dependability and affordability. Precision turned shafts made of alloy steel and double shielded ball bearings insure the smooth movement of shafts. Since 1920, Red Wing motors have provided the precision and torque required by the dental and industrial trades. We are certain you will find Handler Red Wing motors the most durable product for your lab or dental office.

#1 Selling Red Wing Lathe!

26A RED WING LATHE
A full 1/4 HP, 1725/3450 RPM two-speed lathe for use on top of laboratory bench. Its 4 1/2" [11.4cm] shaft height allows for easy use by the technician with hands resting on the tabletop. Maintenance free standard dental, tapered shafts—each includes a right and left chuck remover for easy removal of standard dental chucks. Chucks and accessories ordered separately. The 26A is manufactured to provide years of durable service while being utilized for such operations as polishing and grinding. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost. Shipping Wgt.: 39 lbs [17.7 Kg] Unit Dimensions: 15 1/2” L x 8” W x 7 3/4” H [39cm x 20cm x 20cm] Available in 1/3 HP See Model 28L

26 RED WING LATHE
A full 1/4 HP, 1725/3450 rpm two-speed polishing lathe with 6" [15.2cm] shaft height. Designed and built for use as a polishing lathe, its tapered shaft will accept standard dental tapered chucks. Includes a left and right chuck remover for easy removal of chucks.

The 6" [15.2cm] shaft height of the 26 will allow the technician to utilize larger diameter buffing wheels for pumice and dry polishing operations. The 26 is manufactured to provide years of durable service when used for polishing and grinding. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost. Shipping Wgt.: 41 lbs [18.6 Kg] Unit Dimensions: 15 1/2” L x 8” W x 9 1/4” H [39cm x 20cm x 23cm] Available in 1/3 HP See Model 28H

27 RED WING LATHE
A full 1/4 HP single speed 3450 rpm polishing motor with a 6" [15.2cm] shaft height (115Volts/60Hz). Designed to be utilized by the technician who desires a single speed polishing motor where a 3450 rpm speed is used exclusively for polishing. Chucks accessories additional. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost. Shipping Wgt.: 41 lbs [18.6 Kg] Unit Dimensions: 15 1/2” L x 8” W x 9 1/4” H [39cm x 20cm x 23cm] Available in 1/3 HP See Model 28H

16B CHUK/CHANGER WITH LATHE

Model 16B is the Chuk/Changer factory-installed to the right side of a 26A Low Base, Red Wing Lathe. This combination provides the technician with the ultimate in chuck changing efficiency at both low and high lathe speeds. The movement of the activating handle allows the technician to change from 1/4” [6.4mm] to 3/32” [2.4mm] burs, mandrels and chuck accessories without stopping the lathe. This combination will pay for itself in time saved, while providing excellent concentricity for accurate, professional results in finishing appliances. All chuck and maintenance accessories included. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.

Shipping Wgt.: 41 lbs [18.6 Kg]
Unit Dimensions: 18 1/4” L x 8” W x 7 3/4” H [45cm x 20cm x 19cm]

Available in 1/3 HP - Model 16SB

16C ACCELA/ROTOR

The 16C Accela/Rotor is a combination of the Handler Accela/Rotor attachment 16D and No. 26A Red Wing Lathe. The Accela/Rotor attachment converts the right side of the lathe from standard lathe speeds of 1725/3450 rpm to 12,000 and 24,000 rpm for use in finishing non-precious alloys and chrome-cobalt alloys. The 16C is shipped complete with a Red Wing Lathe, Accela/Rotor with movable light and protective shield, high speed spindle, adjusting levers and necessary guards. The high speed spindle incorporates an activating handle which opens and closes the 3/32” [2.4mm] collets for ease of changing burs and mandrels while the motor is running. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.

Shipping Wgt.: 50 lbs [22.7 Kg]
Unit Dimensions: 19” W x 9” H x 11” D [48.2cm x 22.9cm x 30cm]

INSTALL ON YOUR 26 OR 26A RED WING LATHES

16B-1 CHUK CHANGER

Model 16B-1 is the 16 Chuk/Changer factory-installed on the right side of a Model 26 High Base Red Wing Lathe. The 16B-1 will allow the technician to utilize larger diameter buffs and abrasives, while obtaining the accuracy and speed of interchanging both 3/32” [2.4 mm] and 1/4” [6.4 mm] burs, mandrels and chuck accessories while the lathe is in motion. This combination will pay for itself in time saved, while providing excellent concentricity for accurate, professional results in finishing appliances. All chuck and maintenance accessories included. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.

Shipping Wgt.: 45 lbs [20.4 Kg]
Unit Dimensions: 18” W x 8” D x 9 1/4” H [45cm x 20.3cm x 23cm]

Available in 1/3 HP - Model 16SB-1

Order 16B and 16B-1 with the 7L Spindle
See page 9

16D THE 16D ACCELA/ROTOR ATTACHMENT TURNS YOUR RED WING LATHE INTO A HIGH SPEED ALLOY GRINDER. IT ATTACHES TO THE RIGHT SIDE OF YOUR RED WING LATHE AND PROVIDES 12,000 AND 24,000 RPM SPEEDS FOR PROPER METAL FINISHING. SHIPPED COMPLETE WITH ALL NECESSARY GUARDS, INSTRUCTIONS, LIGHT, AND HIGH SPEED SPINDLE.

Shipping Wgt.: 11 lbs [5.0 Kg]
Unit Dimensions: 14” W x 12” D x 17” H [36cm x 31cm x 43cm]
67A AUTO-CHUCK KIT
An automatic chuck kit designed specifically for the changing of the chuck attachments listed below while lathe is in motion. The Auto-Chuck provides the user with fast chuck changing at a lower cost than many precision chucks. This chuck is designed for gross reduction and rough trimming. Easily installs onto a dental tapered shaft. The 67A kit includes a wrench for tightening the bur adapter. Specify 67AR (right) or 67AL (left) when ordering.
Kit includes one of each:
• 67-0 Auto-chuck
• 67-4 Wrench
• 67-5 Stone Chuck (Right or Left)
• 67-7 Tapered Chuck (Right or Left)
• 67-8 3/32” [0.2cm] Bur Chuck (Right or Left)
• 67-9 Arbor Chuck (Right or Left)
Shipping Wgt.: 1 lb [0.5 Kg]
Unit Dimensions: 5” L x 3 3/4” D x 1” H [12.7cm x 9.5cm x 2.6cm]

16 CHUK/CHANGER COMPLETE
The Handler Chuk/Changer was designed to provide full automatic, precision changing of 1/4” [6.3mm] and 3/32” [2.4mm] diameter burs, mandrels and chuck accessories with the slight movement of a handle while the motor is turning. The Chuk/Changer provides the technician with exacting concentricity and quick, easy changing of various chucks which greatly speeds grinding, polishing and finishing procedures. The 16 Chuk/Changer is installed on the right side of the lathe and is adaptable to most types of dental motors, including Red Wing and Baldor (special adapter required). The 16 Chuk/Changer is shipped complete. NOTE: Available for left side Model 16L.
Shipping Wgt.: 3 lbs [2.3 Kg]
Unit Dimensions: 8 3/4” L x 4” W x 6 1/4” H [22cm x 10cm x 16cm]
7 TAPERED STEEL CHUCK
The 7 tapered chuck is designed specifically for use with buffing wheels, brushes and lead centered wheels. Precision manufactured of alloy steel, this chuck is built for placement onto lathes and polishing motors containing standard dental tapered shafts. Specify 7L (Left) or 7R (Right) when ordering. Shipping Wgt.: 6 oz [107 g] Unit Dimensions: 5/8” Shank Diameter x 3 5/8” L [2cm x 9cm]

7BTAPERED BRASS CHUCK
The 7B tapered chuck is designed specifically for use with buffing wheels, brushes and lead centered wheels. The 7B Tapered chuck is made of brass to provide easier on/off placement onto tapered dental shafts, causing less shaft wear. Specify 7BL (Left) or 7BR (Right) when ordering. Shipping Wgt.: 6 oz [107 g] Unit Dimensions: 5/8” Shank Diameter x 3 5/8” L [2cm x 9 cm]

1-6 STONE CHUCKS
Stone Chucks are designed to accommodate abrasive wheels with various inside diameters as indicated below. Handler stone chucks are manufactured to exacting standards from quality brass. For use only on tapered lathe shafts. Specify chuck number (below) when ordering.

#1 STONE - for 3/8” [9.5mm] I.D. (hole size) Wheel - RIGHT
#2 STONE - for 3/8” [9.5mm] I.D. (hole size) Wheel - LEFT
#3 STONE - for 5/16” [7.9mm] I.D. (hole size) Wheel - RIGHT
#4 STONE - for 5/16” [7.9mm] I.D. (hole size) Wheel - LEFT
#5 STONE - for 1/4” [6.3mm] I.D. (hole size) Wheel - RIGHT
#6 STONE - for 1/4” [6.3mm] I.D. (hole size) Wheel - LEFT
Shipping Wgt.: 6 oz [107 g]
Unit Dimensions: 5/8” Shank Diameter x 2” L [2cm x 9cm]

9 ARBOR BAND
Designed to accommodate 3/4” diameter x 3/4” wide [1.9cm x 1.9cm] abrasive bands. Manufactured of alloy steel and plated to fit onto standard dental tapered shafts, the abrasive band is held in place by tightening the end screw against the rubber arbor. Specify 9L (Left) or 9R (Right) when ordering. Shipping Wgt.: 8 oz [227 g]
Unit Dimensions: 4 7/8” L x 5/8” Shank Diameter [12cm x 2cm] with a 1/4” Shank Diameter.

8T JACOBS TYPE JR. CHUCK
The 8T is designed specifically for use with small burs and mandrels which do not exceed 1/4” [6.3mm] in diameter. The 8T is built to be a less expensive and semi-precise adjustable chuck for use on lathes with tapered shafts. This chuck opens with a CCW twist and closes with a CW twist. Specify 8T (right) or 8T-L(left) when ordering. Shipping Wgt.: 8 oz [227 g]
Unit Dimensions: 2 1/4” L x 1” Shank Diameter [6cm x 3cm]

18 ATLAS PRECISION CHUCK
The 18 Atlas chuck is a precise “Jacobs type” chuck for use with chuck accessories having a diameter of .001” [0.03mm] to .250” [6.4mm]. The 18 Atlas chuck attaches to the right shaft of a dental lathe with standard dental tapered shafts. Machined to precision limits, the 18 Atlas provides the technician with concentricity unmatched by any other adjustable chuck with no run-out and no vibration. For Right shaft only. Shipping Wgt.: 1 lb [0.5 Kg]
Unit Dimensions: 2 1/2” L x 1 1/4” Shank Diameter [6cm x 3 cm]

12 STONE CHUCK
Designed with a 1/4” [0.6cm] shank for use in Jacobs type chucks. This stone chuck accommodates abrasive stones with 1/4” [0.6cm] I.D. arbor only. Manufactured of alloy steel and plated. Specify 12L (Left) or 12R (Right) when ordering.
Shipping Wgt.: 4 oz [113 g]
Unit Dimensions: 2 3/16” long x 3/4” Shank Diameter [6cm x 2cm] with a 1/4” Shank Diameter.

13 ARBOR BAND CHUCK
Designed with 1/4” [0.6cm] shank for use in Jacobs type chucks. Accepts 3/4” x 3/4” [1.9cm x 1.9cm] abrasive arbor bands. Manufactured of alloy steel and plated. Specify 13L (Left) or 13R (Right) when ordering.
Shipping Wgt.: 4 oz [113 g]
Unit Dimensions: 2 5/8” L x 3/4” Shank Diameter [7cm x 2cm] with a 1/4” Shank Diameter.

13-1 TAPERED CHUCK
Designed with 1/4” [0.6cm] shank for use in Jacobs type chucks. This tapered chuck is built to accept small buffs, brushes and lead-centered wheels. Made of alloy steel and plated. Specify 13-1L (left) or 13-1R (right) when ordering.
Shipping Wgt.: 4 oz [113 g]
Unit Dimensions: 2 5/8” L x 1/2” Shank Diameter [7cm x 1.3cm] with a 1/4” Shank Diameter.
MODEL TRIMMERS
WET AND DRY APPLICATIONS

Handler Model Trimmers are known the world over for quality, durability and affordability. Built of water grade aluminum, bronze and stainless steel, Handler Model Trimmers are offered in two different wheel sizes - 10" and 12". All units are powered by industrially rated, ball bearing, capacitor start 1725 RPM motors. This non-stalling feature, along with easy access to cleaning and quick wheel change, provide a superior trimmer for your laboratory. All model trimmers are made in the U.S.A., ETL Listed and come complete for easy installation and operation.

Available options include:
- Factory-installed water solenoid to automatically activate water flow.
- Factory-installed Ortho-Angulator orthodontic table.
- High performance balanced, studded diamond wheel.

Model Trimmers come standard with 1/4" thick reversible AND reinforced Carbo-Dent wheel, 2 rubber suction cup feet to raise front for better water flow, better safety and more stability.

31 MODEL TRIMMER
“The Professional” A 10” [25cm] diameter model trimmer powered by a full 1/3 HP ball bearing, capacitor start motor. Features include a swing-open front housing for ease of cleaning and wheel changing, internal gutter to facilitate water runoff, full wheel radius water spray for efficient wheel cleaning, drain trough which completely surrounds the model tray to prevent water leakage, large 1” [2.5cm] diameter water exhaust, motor cover with removable top plastic utility tray. Unit shipped complete, ready to use with minor set-up. Finished with a durable, baked coating. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost. Shipping Wgt.: 48 lbs [21.8 Kg]
Unit Dimensions: 16” D x 13” W x 12 3/4” H [41cm x 33cm x 32cm]

31X MODEL TRIMMER
A “Professional” 10” [25cm] diameter model trimmer powered by a 1/4 HP ball bearing, capacitor start motor for those desiring lower pricing. Features include a swing-open front housing for ease of cleaning and wheel changing, internal gutter to facilitate water runoff, full wheel radius water spray for efficient wheel cleaning, drain trough which completely surrounds the model tray to prevent water leakage, large 1” [2.5cm] diameter water exhaust, motor cover with removable top plastic utility tray. Lower torque feature for those who perform fewer model trimming operations. Shipped complete, ready for use with minor set-up. Finished with a durable, baked coating. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost. Shipping Wgt.: 48 lbs [21.8 Kg]
Unit Dimensions: 16” D x 13” W x 12 3/4” H [41cm x 33cm x 32cm]
32 MODEL TRIMMER
A 12" (30cm) diameter Trimmer designed for the laboratory technician who trims plaster and stone models on a daily basis. Powered by a FULL 1/2 HP ball bearing, capacitor start motor, the 32 features a larger frontal opening and additional grinding capacity to trim models faster and easier.

The swing-open front housing with full wheel radius water spray, internal gutter for water diversion, surrounding drip trough, and motor cover with utility tray, makes this trimmer an excellent addition to the working laboratory. Shipped complete, ready to use with minor set-up; finished with a durable, baked coating. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.
Shipping Wgt.: 55 lbs [22.7 Kg]
Unit Dimensions: 16" D x 15" W x 14 1/2" H [41cm x 38cm x 37cm]

32X MODEL TRIMMER
A 12" (30cm) diameter Model Trimmer powered by a 1/3 HP ball bearing, capacitor start motor for those desiring lower pricing and lower torque. The swing-open front housing with full wheel radius water spray, internal gutter for water diversion, surrounding drip trough, and motor cover with utility tray, makes this trimmer an excellent addition to the working laboratory. Shipped complete, ready to use with minor set-up; finished with a durable, baked coating. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.
Shipping Wgt.: 55 lbs [22.7 Kg]
Unit Dimensions: 16" D x 15" W x 14 1/2" H [41cm x 38cm x 37cm]

32-3/4 MODEL HI-TORQUE MODEL TRIMMER
A Hi-Torque 12" diameter Model Trimmer powered by a 3/4 HP, capacitor start, 1725 rpm, ball bearing motor. Designed for and built for the very busy laboratory that trims a large quantity of models each day or the technician who wants maximum torque. A full wheel internal water spray washes the entire wheel as it rotates inside the aluminum housing, keeping the trimming wheel clean during operation. This rugged, Hi-torque trimmer is built to provide years of trouble free service. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.
Shipping weight: 62 lbs. (27.2 Kg)
Unit Dimensions: 16" D x 15" W x 14-1/2" H [41cm x 38cm x 37cm]

ORTHO ANGULATOR MODEL TRIMMERS
An Orthodontic Angulator Attachment for precise grinding of angles onto plaster or stone models. Easily set to desired angle up to 120 degrees from mid-line in 5 degree increments. Produces precise angled models for study presentation. For Handler 10" [25cm] or 12" [30cm] Model Trimmer. Orthodontic Angulator must be factory installed by Handler.
Shipping Wgt.: 1 lb [0.5 Kg]
Unit Dimensions: 5 1/4" x 5 1/4" [13cm x 13cm]

31DTS DRY MODEL TRIMMERS
Handler 31 model trimmer with 10" abrasive disc, 5 gallon cyclone with cartridge filter to trap dust particles for easy disposal. A 62-II super sucker draws a powerful 110 cfm through the cyclone and entraps particles 0.5 microns and larger. Hoses connect the 3 components, dust is removed from the work area and falls into a 5 gallon cyclone cannister. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.
Shipping Weight: 95 lbs. (3 boxes per system)
PTL-231
Petite Plaster Bench
Shipping weight: 185lbs
Dimensions: 35” W x 36” H x 24” D

- Sturdy steel construction
- Leg levelers
- Durable oven-cured powder coated finish
- Light weight – 35”W x 24”D work surface
- Resistop© sink and drain
- Gooseneck lab faucet
- Optional in drawer plaster bin liner
- Optional kick plate hands free water activation
- Resistop© work surface
- Compact space design
- No assembly – easy install
- Affordable price

PTL-211 DESK
Shipping weight: 185lbs
Dimensions: 35” W x 36” H x 24” D

To order the PTL-231, please contact your dealer representative.
DUST COLLECTION

For over 90 years, Handler has built durable, functional and affordable dust collectors. Our experience with dust collectors is second to none in the dental trade. We are certain you will find a Handler dust collector to fit your requirements. Should you require assistance in designing a suction system for your laboratory contact Handler. Our design staff will provide you with layout assistance. For those cases when a central system is not indicated, we offer a variety of units for the benchtop and underbench positioning. Some different types of dust require certain types of filters. Please contact us to discuss the filtering capability of the different filtering media Handler uses.

Our New Dust Collectors

550A UNDER BENCH PORTA-VAC DUST COLLECTOR
The 550A is a compact starter dust collector of sturdy steel construction with disposable HEPA filter designed for light duty dry grinding applications in the dental laboratory. The HEPA filter, 182 cubic inches of filter area collects 0.3 micron for a healthier, safer work environment. Powerful high velocity vacuum motor moves 125 CFM. The 550A comes standard with 6’ flexible hose that can be attached to a variety of suction inlets, and remote on/off control foot switch. Various suction inlets are available. Replacement disposable HEPA filter part number 62-IIDF.
Shipping Wgt.: 20 Lbs [9 kg]
Dimensions: 14 ½”L x 9 ¼”W x 11 ½”H [37cm x 23.5cm x 29cm]

62-IICC CAD/CAM MILLING DUST COLLECTOR
The latest innovation in dust collection for milling applications, especially suited for Zirconia and other milling materials. The 62-IICC is compact and lightweight. It includes a powerful vacuum suction motor; factory installed HEPA filter, charcoal filter, foot activation on/off switch and variable speed air flow control. The disposable HEPA filter has a volume capacity of approximately 182 cubic inches to mill hundreds of crowns before changing the bag. The HEPA filter is conveniently located in the front compartment for easy removal and disposal. Weighing in at only 35 pounds, the 62-IICC can be easily deployed, and is compatible with most bench top milling applications. Replacement disposable HEPA filter part number 62-IIDF
Shipping Wgt: 35 Lbs [16 Kg]
Unit Dimensions: 10” W x 15-1/2” D x 13” H [25cm x 39cm x 35.5cm]
550 PORTA-VAC BENCH TOP DUST COLLECTOR
A favorite of dental offices since its introduction several years ago, the 550 Porta-Vac is perfect for bench top light grinding and polishing with a hand piece or lathe. Featured enhancements include 40% more suction power, compact in line suction design, removable resin clean out tray, replaceable clear acrylic shield and reusable and replaceable pleated rear filter. The compact and lightweight 550 comes with a fluorescent light for hours of cool, bright operation and will collect 0.5 microns of dust and larger particles. Easy operation; take it out of the box, install the light, plug it in, and it is ready for use. The durable white powder coated heavy gauge steel frame is built to last, and the unit is made in the USA by Handler.
Shipping Weight: 18 lbs  Unit Dimensions: 8 1/2” W x 12” H x 14” D
Available in 220V/50Hz – Order Model 550-E

52CSU ETCHER CATCHER
Handler’s Etcher Catcher is designed to collect dusts from aluminum oxide sandblasting; it is also excellent for handpiece grinding. Built with a larger cabinet and hinged Viewport, the 52CSU provides greater suction capacity to collect dusts in its cleanable, reusable cartridge filter. The bottom screen allows larger debris to collect on the bottom of the cabinet out of the air stream. Fluorescent light provides excellent visibility; rubber gaskets surrounding the two hand holes help keep dust contained in the cabinet. 115V/60HZ.
Shipping Wgt.: 17 lbs (7.3Kg)
Unit Dimensions: 11” W x 16” D x 9” H (28cmx41cmx23cm).
Available at 220V/50HZ – Model 52CSU-E. Available as a dust collection cabinet with filter and 3” flange to attach suction – Model 52CFI

52PAB
Handler’s Paasche-style etching pencil is easy to set up and ideal for use with Handler’s 52CSU Etcher Catcher. The 52PAB etching pencil comes complete with air tubing and a 6 oz. canister of aluminum oxide.
Shipping Weight: 3 lbs [1.4Kg]
Dimensions: 5 ½”L x 3 ½” x 1 ¼”H [14cmx9cmx3cm]

51 SANDBLASTER
A table-top sandblaster for use with Sand, Glass Beads or Walnut Shells, the 51 is designed to clean or treat the surfaces of precious castings e.g. copings, pontics, inlays, etc. Its compact size, with hinged, frontal access door, rubber side glove, large 5” [13cm] square window, lever air control valve and 3” [7.6cm] diameter exhaust port, allows for placement in a small lab area. Shipped complete with 3’ x 1/2” [8cm x 1cm] air line hose, interior light, 5 lbs [2.3 Kg] of medium sand abrasive, and filter bag, the 51 is an excellent addition to any laboratory. Constructed of heavy gauge sheet steel and finished in a durable, baked coating.
Shipping Wgt.: 22 lbs [7.7 Kg]
Unit Dimensions: 10” W x 10” D x 14” H [25cmx25cmx36cm]
Walnut Shell Blaster - Order Model 51W
62-II SUPER SUCKER II
Designed to provide excellent suction to a single bench top work position, the 62-II Super Sucker develops 110 CFM (cubic feet / minute) at a static pressure of 63” of H20 and is one of the most powerful single station dust collectors available. Designed for continuous duty, the disposable HEPA filter bag is easily removed through the front access door with the removal of two thumb screws. A rear internal activated charcoal filter aids in the removal of acrylic monomer odors.

The 62-II Super Sucker is shipped complete with the dust collector with variable speed controlled suction motor, 6 feet of 2-1/2” flex hose and a fishmouth. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.  
Shipping Wgt: 35 lbs [16 Kg]
Unit Dimensions: 10” W x 15-1/2” D x 13” H (25cm x 39cm x 35.5cm)
Available as a dust collector and hose only - Model 62-II-0
Available as a dust collector with splash hood - Model 62-IISH

62 SUPER SUCKER
Designed to provide maximum suction capacity, the No.62 Super Sucker develops 225 CFM suction capacity through two top inlets. Dust and grindings are entrapped in a removable, disposable paper filter. A secondary polyester filter entraps finer dusts. A third filter made of activated charcoal removes up to 75% of acrylic monomer odors.

Shipped complete with two fishmouths, two four foot sections of 3” (7.6cm) flexihose and four clamps, this unit is an excellent addition to the smaller laboratory. The 62 Super Sucker is not for use with aluminum oxide and is designed for intermittent use. For continuous use, or use with aluminum oxide, see Models 62-II and 60UFC.
115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.
Shipping Wgt.: 36 lbs [16.3 Kg]
Unit Dimensions: 14 3/4” W x 8 1/2” D x 17 3/8” H (37cm x 22cm x 44cm)
Available as a dust collector with hose only - Model 62-0

60UFC DUST COLLECTOR
Introducing the NEW 60UFC DUAL WORK STATION DUST COLLECTOR With Drum Cartridge Filters. HANDLER unites state of the art drum cartridge filter technology with traditional power and functionality to yield the most cost effective dust extraction system on the market.

Special LOW introductory price, Same Handler quality, Strong Handler performance, Improved filter technology, 33% more filter area, Easy to clean - easy to replace, Collects 0.5 Micron and larger dust particles, Helps keep the work environment clean and healthy, powerful 1/2 HP brushless suction system yields 400 CFM. Comes with two hoses and two fishmouth suction inlets. 115V/60Hz. Also available in 230V/50Hz, 230V/60Hz and 115V/50Hz at additional cost.
Shipping Wgt.: 80 lbs [36.3 Kg] (Ships in two cartons)
Unit Dimensions: 15 1/8” W x 14 7/8” D x 22” H (38cm x 37.8cm x 55.9cm)
Available as a dust collector with a set of 14 shakeable cotton cloth filter bags - Model 60U-D.
Central Dust Collection Units for Multiple Work Stations

**77 DYNA VAC**
A 3/4HP suction unit designed to provide suction for up to 3 work positions, simultaneously. Powered by a ball bearing, capacitor start, industrially rated brushless motor, the model 77 provides cost effective dust extraction with a state of the art drum cartridge filter technology which collect particles as small as ½ microns.

The 77 dust collector generates 600CFM (cubic feet per minute) through the inlets provided. The unit is finished in a baked, durable coating, runs on 115V/60HZ and ships complete with switch and box type silencer.

Shipping weight: 240 lbs. (108.9 kg)
Unit dimensions: 24” W x 20” D x 38 ½” H (61cm x 51cm x 98cm)
Available with 24 cloth filter bags.

**101 DUST COLLECTOR**
A 1 HP suction unit designed to provide suction for up to 4 work positions, simultaneously. Powered by a 1 HP ball bearing, capacitor start, industrially rated brushless motor, the model 101 provides cost effective dust extraction with a state of the art drum cartridge filter technology which collect particles as small as ½ microns.

The 101 dust collector generates 800CFM (cubic feet per minute) through the inlets provided. The unit is finished in a baked, durable coating, runs on 115V/60HZ and ships complete with switch and box type silencer.

Shipping weight: 270 lbs. (108.9 kg)
Unit dimensions: 26” W x 24” D x 41” H (66cm x 61cm x 104cm)
Available with 24 cloth filter bags.

**103 DUST COLLECTOR**
A 3 HP suction unit designed to provide suction for up to 8 work positions, simultaneously. Powered by a 3 HP ball bearing, capacitor start (single phase only) industrially rated brushless motor, the model 103 provides cost effective dust extraction with a state of the art drum cartridge filter technology which collect particles as small as ½ microns.

The 103 dust collector has a suction capacity of 1250 CFM (cubic feet per minute) through the inlets provided. The unit is finished in a baked, durable coating, runs on 115V/60HZ and ships complete with a fusebox switch box and a box type silencer.

Shipping weight: 410 lbs. (180 kg)
Unit dimensions: 30” W x 24 1/16” D x 58” H (76cm x 61cm x 147cm)

Please provide a sketch showing room dimensions and workstations for free layout of central suction system.

Available in the following alternative configurations:
- 220V/60HZ, single phase – Order model 103-2201
- 220V/60HZ three phase – Order model 103-2203

**105 DUST COLLECTOR**
A 5 HP suction unit designed to provide suction for up to 8 work positions, simultaneously. Powered by a ball bearing, industrial 5HP, 220V/60HZ three phase motor, the model 105 provides cost effective dust extraction with a state of the art drum cartridge filter technology which collect particles as small as ½ microns.

The 105 dust collector has a suction capacity of 1800 CFM (cubic feet per minute) through the inlets provided. The unit is finished in a baked, durable coating, and ships complete with switch and box type silencer.

Please provide a sketch showing room dimensions and workstations for free layout of central suction system.

Shipping weight: 450 lbs. (180 kg)
Unit dimensions: 30” W x 24 1/16” D x 58” H (76cm x 61cm x 147cm)

**SUCTION INLETS**
Four 3” (7.6cm) flanges – two mounted on each side of unit

**C.F.M.**
600 C.F.M.

**FILTRATION**
Two drum cartridge filters provide superior filtration for all lab applications

**REPLACEMENT FILTERS**
Order 60FC filters, quantity 2

**SUCTION INLETS**
Four 3” (7.6cm) flanges – two mounted on each side of unit; different sized suction inlet(s) up to 6” diameter can be supplied

**C.F.M.**
1250 C.F.M.

**FILTRATION**
Two drum cartridge filters provide superior filtration for all lab applications

**REPLACEMENT FILTERS**
Order 103FC filters, quantity 2

**SUCTION INLETS**
Various diameter inlets up to 7” can be supplied to match user requirements

**C.F.M.**
1800 C.F.M.

**FILTRATION**
Two drum cartridge filters provide superior filtration for all lab applications

**REPLACEMENT FILTERS**
Order 105FC filters, quantity 2
DENTURE - Curing & Processing

Handler manufactures two basic boilout/curing and boilout/curing/washout units. Single curing, boilout or washout units are built on a custom-made basis. All units are built to fit into existing steel cabinets or Handler’s louvered cabinets and should not be installed without a steel cabinet. Each may be fabricated to be compatible with manufactured gas, natural gas, or electric.

26102SSWC CURING UNIT

The 26102SSWC is the ultimate curing device for processing multiple dentures properly and efficiently. This unit is manufactured of heavy gauge stainless steel with seamlessly integrated curing tanks, backsplash and marine edge to stop water from running off. The vented cabinet is heavy gauge steel with an oven cured powder coated finish. Each tank is insulated to retain heat and can hold up to 16 flasks for maximum productivity in the denture lab. The 26102SSWCEL model is electrically powered and has two 2Kw copper heating elements electrically controlled. Each heating element has a built in safety shut off. Please specify 208V, 220V or 240V when ordering. The unit can also be purchased for use with natural or propane gas, model 26102SSWCG. Each burner produces 7,500 BTU’s. Also included with each unit is a lid for each tank and stainless steel flask trays.

Shipping Wgt.: 350 lbs [158.8 Kg]
Unit Dimensions: 35” wide x 24” deep x 36 3/4” high [89 cm x 61cm x 93 cm]

26105SSWC BOILOUT/CURING UNIT

Handler introduces a New Boilout/Washout/Curing Unit complete with powder coated cabinet. Built & designed by Handler THE NEW 26105SSWC will provide your prosthetics laboratory with years of service at almost 40% savings over competitive units. Vented cabinet with internal shield, Available with economical gas or electrical powered, Heavy duty recirculating pump, Four faucet washout-tank-turn on walk away de-wax dentures, partials and flasks. Additional faucet (P26105-30F) available to fill tanks. Curing unit holds 8 two flask compresses-16 flasks, Heavy gauge stainless steel for durability & functionality, Sinks built into stainless steel top with seamless design, Marine Edging keeps water from running off work surface, built by Handler in the U.S.A.

Shipping Wgt.: 350 lbs [158.8 Kg]
Unit Dimensions: 35” wide x 24” deep x 36 3/4” high [89 cm x 61cm x 93 cm]

FOR SPECIAL ORDER CURING, BOIL-OUT/WASHOUT UNITS built to your specifications, CALL HANDLER OR YOUR DISTRIBUTOR FOR DETAILS.

26101 - SINGLE CURING TANK
26103 - 3 CURING TANK CURING SYSTEM
26104 - SINGLE WASHOUT UNIT

P26105-30F Fill Faucet
2010DCU
TWO-STAGE DIGITAL CURING UNIT

The 2010DCU Denture Curing Unit is a sophisticated curing unit featuring:

- 2-Stage curing unit with a digital control panel on which sequences of polymerizing times and temperatures can be programmed as required by user.
- The time of each step can be set between 0 and 999 minutes. The end temperatures at each plateau can be regulated by the user between 32°F and 210°F (0°C and 99°C).
- To enable the user to see the actual program status at all times, the curing unit has a synoptic display.
- Programming. It is extremely easy to program a heating sequence for the water in the tank.
- Low maintenance and easy cleaning.

The 2010DCU Denture Curing Unit has a circuit breaker (fuse in power inlet) that protects the machine against electric overloads.

Unit Dimension: 13.8” H x 16.5” W x 14.9” D (350mm x 420mm x 380mm)
Tank Dimension: 11” H x 10” W x 10” D (280mm x 255mm x 255mm)
Weight: 45 lbs [17kg]
Power Supply: 115V, 50/60Hz, 13A Consumption: 1500 W
Available in 230V/50/60Hz, 6 Amp – Model 2010DCU-E

448PP - 8 QT PNEUMATIC PRESSURE POT
An 8 Quart Pneumatic Pressure Pot
Made of sturdy cast aluminum The new 448PP pressure vessel is built to provide 20 psi pressure* - while the acrylic resin is curing – forming a dense crosslinked repair for the dentist and patient.

The 448PP will not only allow for proper denture repair and relines. The 448PP is shipped complete with pressure gauge, safety valve, air valve to introduce air into the pot, plus an air hose ready to connect to your compressor air source.

Shipping Wgt: 12 lbs [5.4 Kg]
Unit Dimension: 19” L x 8” H / Outside Diameter: 11” / Inner Diameter: 9 3/4” / Depth: 6”
* maximum internal pressure with safety valve = 22 psi
POLISHING UNITS

Our experience with polishing units is second to none in the dental trade. Whether you need a benchtop unit for low volume or a stand-up unit for high volume grinding and polishing, we are certain you will find a Handler polishing unit to fit your requirements.

575 MULTI-FUNCTIONAL
BENCH TOP POLISHING SYSTEM

Complete bench top polishing system comes with a heavy gauge, stainless steel, powder coated cabinet, two suction motors & cartridge filters, two fluorescent lights, two dust collection trays, two insert pans and a 26A Red Wing Polishing lathe. Each suction motor delivers a powerful 225CFM, collects 0.5 microns of dust, easy access to reusable, replaceable pleated rear cartridge filter. Replaceable, adjustable clear acrylic shield protects user from debris, and can be set at different heights to accommodate user sitting down or standing up. Baked on durable powder coating, arm rests for comfortable, sustainable operation.

Designed & Built by HANDLER in the U.S.A. Affordably priced significantly lower than other competitive units. Easy operation for dry grinding, or polishing with pumice using the pumice pans. Powerful suction system protects user with safer, healthier environment. (Helps to meet OSHA standards). 115V/60Hz. Also available in 230V/50Hz and 230V/60Hz at additional cost.

Shipping Wgt: 115 lbs (Shipped in two cartons)

Unit Dimensions: 32”W x 16” H x 21” D

Also without lathe - order Model 575-0

Shipping Wgt: 75 lbs.

575-0 SAME AS THE 575
WITHOUT A 26A RED WING POLISHING LATHE

76D-3 BENCH TOP COMPLETE

A bench top polishing unit designed to provide 365CFM (cubic feet per minute) suction through two suction inlets while being utilized with a model 26A Red Wing Lathe for light polishing and grinding. The interior polishing area includes two light sockets to provide proper light, and two shields are affixed to the front of the cabinet to protect the technician.

The 76D-3 is constructed of heavy gauge sheet steel and finished in a durable, baked coating. Two reversible and replaceable filters entrap dusts as small as 5-10 microns and larger. Two aluminum pumice pans are provided to hold wet pumice and dry grindings. This unit is not recommended for use with gypsum or ALO. 115V/60Hz. Also available in 230V/50Hz and 230V/60Hz at additional cost.

Shipping wgt.: 105 lbs [48 Kg] – (Ships in two cartons)

Unit dimensions: 29” W x 20 ¼” D x 13” H

Shipping wgt.: 66 lbs [30kg]
60FC-TS
POLISHING UNIT OFFERS THE LATEST DUST COLLECTION TECHNOLOGY APPLIED TO EXISTING, DEPENDABLE HANDLER DESIGN.

The 60FC-TS, the NEW standard of the laboratory industry, is designed with two drum cartridge filters for maximum performance to help keep your air clean and remove dusts from the environment. The filters are mounted onto a platform that can be easily removed for cleaning operations. The powerful 1/3 HP suction motor will process 500 CFM (cubic feet of air per minute). Two mounted aluminum polishing hoods (7” W x 10 1/2” D x 14” H) contain dusts, polishing compounds, and debris.

The 60FC-TS is sold complete with a two speed 26 Red Wing high base lathe. The 60FC-TS can be used with most dust collection applications in the lab, including plaster, stone, pumice, and tripoli rouge. 115V/60Hz. Also available in 230V/50Hz and 230V/60Hz at additional cost.

Shipping Weight: 300 lbs. [136 Kg]
Unit Dimensions: 56” H x 18” D x 32” W — 38” to bench top
[142cm x 46cm x 81cm — 97cm]

Available without Red Wing Polishing Motor - Model 60FC-D
Available with 2 fiberglass filters in lieu of drum cartridge filters – Model 60C-TS

60FC-RETRO
Your existing 60C can be retrofitted with new drum cartridge filters.
Call and ask how.

60FC-1-TS
The 60C-1-TS is designed for users who desire a larger work area for polishing and grinding operations. The larger polishing hoods (11” high x 18” deep x 14” wide) allow technicians to polish from a seated or standing position. Its two drum cartridge filters provide almost twice the filter area of traditional fiber glass filters. The filters can be easily removed for cleaning, to help keep air clean and remove dusts from the environment.

The 60FC-1-TS has a powerful 1/3 HP suction motor which provides suction capacity of 500 CFM (cubic feet per minute). The unit is sold complete with the two speed model 26 Red Wing high base lathe. 115V/60Hz. Also available in 230V/50Hz and 230V/60Hz at additional cost.

Shipping wgt: 360 lbs (163 Kg)
Unit Dimensions: 56” H x 24” D x 42” W — 38” high to bench top
[142cm x 61cm x 107cm]

Available with 2 fiberglass filters in lieu of drum cartridge filters – Model 60C-1-TS
75D-FC POLISHING GRINDING UNIT

Handler has re-designed its most popular polishing and grinding unit to include drum cartridge filter technology. The 75D-FC is a professionally designed grinding and polishing unit built specifically for dry grinding operations such as grooving plaster models, dry polishing and dry model trimming. The 75D-FC is powered by a ¾ HP suction motor which produces 600 CFM (cubic feet per minute) suction capacity.

The two drum cartridge filters can entrap material as small as .5 microns, helping to keep your air clean and remove dusts from the environment. The filters can be easily removed for cleaning and re-installed. Two mounted aluminum polishing hoods (7” W x 10 ½” D x 14” H) contain dusts, polishing compound and debris. The unit is sold complete with the two speed model 26 Red Wing high base lathe. Available in 230V/50Hz and 230V/60Hz at additional cost.

Shipping Wgt.: 350 pounds
Unit dimensions: 56” H x 32” W x 24” D – 40” to work surface (42cm x 81cm x 61cm)

Available without model 26 lathe – Model 75D-FC-O
Available with 24 cloth filter bags and model 26 lathe – Model 75D
Available with 24 cloth filter bags without model 26 lathe – Model 75D-0

Hazardous Containment Device for the Lab
S.H.I.E.L.D.
(Safety Hazard Intervention Environmental Low Cost Device)

Avenger Model 86A
HANDLER’s AVENGER is THE device that makes it efficient and easy to disinfect after EVERY polishing application, so you can be compliant.

- Manufactured of sturdy resin material with no hardware or secured fixtures
- Bright white resin material makes for better viewing and illumination
- Removable acrylic shield is coated to prevent scratching
- Hood & bottom pan are separate with no hardware for easy and fast cleaning
- The spacious cavity makes it comfortable and ergonomic for any user
- A 3” dimple in the rear that can be cut off to add suction
- The 86A can be used with any lathe or handpiece

Shipping Wgt.: 6 lbs. [2.7 kg]
Dimensions: 10” W x 15” D x 12” H [25cm x 38cm x 30cm]

HANDLER’s OSHA Safety Splash Hoods available in:

- Aluminum Splash Hoods
- Resin Splash Hoods
- Stainless Steel Splash Hoods
SPLASH HOODS

Our resin splash hoods are fast becoming our most popular, durable, easy to clean, with no rusting or pitting product. Our aluminum splash hoods are available in three different sizes. Handler splash hoods are available with or without a light; we strongly recommend the purchase of a splash hood with a shield for safety purposes and OSHA compliance.

Aluminum Splash Hoods (6” wide)

86D - Aluminum Splash Hood with light, shield and insert pan
Light on left: 86D-L or Light on right: 86D-R
Shipping Wgt.: 4 lbs [1.8Kg] Dimensions: 12” H x 6” W x 10” D

Additional options:
86D-LA OR 86D-RA
3” Diameter Flange for connection to dust collector
86D-LB OR 86D-RB
3” diameter flange plus blastgate (suction cutoff)

83NL-S - Aluminum Splash Hood with Shield and insert pan
Shipping Wgt.: 4 lbs [1.8Kg] Dimensions: 12” H x 6” W x 10” D

Additional options:
83NL-SA
3” Diameter Flange for connection to dust collector
83NL-SB
3” diameter flange plus blastgate (suction cutoff)

Aluminum Splash Hoods (8” wide)

84WL - Aluminum Splash Hood with light, shield and insert pan
Light on left: 84WL-LS or Light on right: 84WL-RS
Shipping Wgt.: 4 lbs [1.8Kg] Dimensions: 12” H x 8” W x 12” D
Add “A” for 3” diameter flange, “B” for flange and blastgate

84NL-S - Aluminum Splash Hood with Shield and insert pan
Shipping Wgt.: 4 lbs [1.8Kg] Dimensions: 12” H x 8” W x 12” D
Add “A” for 3” diameter flange, “B” for flange and blastgate.

Aluminum Splash Hoods (10” wide)

85WL - Aluminum Splash Hood with light, shield and insert pan
Light on left: 85WL-LS or Light on right: 85WL-RS
Shipping Wgt.: 5 lbs [2.3 Kg] Dimensions: 12” H x 10” W x 14” D
Add “A” for 3” diameter flange, “B” for flange and blastgate

85NL-S - Aluminum Splash Hood with Shield and insert pan
Shipping Wgt.: 5 lbs [2.3 Kg]
Dimensions: 12” H x 10” W x 14” D
Add “A” for 3” diameter flange, “B” for flange and blastgate

Resin Splash Hoods (6” wide)

86RHL - Resin Splash Hood with light, shield and insert pan
Light on left: 86RHL-L or Light on right: 86RHL-R
Shipping Wgt.: 4 lbs [1.8Kg] Dimensions: 12” H x 6” W x 10” D

Additional options:
86RHL-LA OR 86RHL-RA
3” Diameter Flange for connection to dust collector
86RHL-LB OR 86RHL-RB
3” diameter flange plus blastgate (suction cutoff)

86RHN-S - Resin Splash Hood with shield and insert pan
Shipping Wgt.: 4 lbs [1.8Kg] Dimensions: 12” H x 6” W x 10” D

Additional options:
86RHN-SA
3” Diameter Flange for connection to dust collector
86RHN-SB
3” diameter flange plus blastgate (suction cutoff)

Stainless Steel Splash Hood

88D PERMA-GARD SPLASH HOOD
Long lasting, rust-resistant Stainless Steel Splash Hood for all your grinding and polishing applications.
Light on left: 88D-L or Light on right: 88D-R
Shipping Wgt.: 8 lbs [3.6Kg] Dimensions: 12” H x 6” W x 10” D

86B STA-KLEEN SHIELD - A Clear acrylic shield is a must for OSHA compliance. Adjustable to any vertical position within 180 degrees for maximum protection from flying debris and wet pumice. Wipes clean with a damp cloth; can be used on all Handler splash hoods and on other models as well. Shipping Wgt.: 2 lbs [1.8Kg]
Dimensions: 6” W x 9” L [15cm x 23cm]
FLASKS & PRESSES - Durable BRONZE Manganese Alloy.

Manufactured of durable bronze manganese alloys, Handler flasks and compresses set an exacting standard for the lab technician. Handler presses are manufactured of malleable/ductile iron, grey iron, and alloy steels for durability and continued function. We use only the highest quality materials. Handler pioneered denture processing equipment.

61B TWO FLASK COMPRESS
Our most popular denture compress is built to hold two conventional flasks for simultaneous curing. Sturdily built of bronze alloy, its rustproof cast body will provide years of service. Two stainless steel springs give equalized compensatory pressure during curing operation. A suitable allen wrench, wood capped holding handle and brass lifting handle are supplied with each compress. Flasks not included.
Shipping Wgt.: 8 lbs [3.6 Kg]
Unit Dimensions: 4 1/8" L x 2 1/2" W x 7 1/2" H
[11cm x 6cm x 19cm]

61A ONE FLASK COMPRESS
Shipping Wgt.: 7 lbs [3.2 Kg]
Unit Dimensions: 4 3/4" L x 2 7/8" W x 5 3/4" H
[12cm x 7cm x 15cm]

61C THREE FLASK COMPRESS
Shipping Wgt.: 9 lbs [4.0 Kg]
Unit Dimensions: 5" L x 2 5/8" W x 10 3/4" H
[13cm x 7cm x 27cm]

44G ATLAS GIANT FLASK
The 44G is used for upper and lower. When conventional size flasks are not large enough, the 44G should be utilized. Cast of bronze alloy, the 44G is widely used in reconstructive maxillo-facial procedures. The 44G is fitted with three separate sections, a bottom K.O. disc and rear tapered stainless steel guide pins for easier flasking and de-flasking. The 44G is a cast flask in the upper configuration.
Shipping Wgt.: 5 lbs [2.3 Kg]
Unit Dimensions: 4 5/8" L x 4 3/8" W x 2 3/4" H
[12cm x 11cm x 7cm]

44U ATLAS FLASK
This UPPER Flask is forged of special alloy bronze to provide years of durable service. Fitted with hardened stainless steel alloy rear tapered guide pins, this ejector type flask has long been a favorite of leading Prosthodontists, dental schools and commercial laboratories. Dropped forged with glass-like smooth surfaces, models are easily ejected with the aid of the bottom ejection disc.
Shipping Wgt.: 3 lbs [1.4 Kg]
Unit Dimensions: 4" L x 3 3/4" W x 2 1/4" H [10cm x 10cm x 6cm]

44L ATLAS FLASK
This LOWER Flask is forged of special alloy bronze to provide years of durable service, with a slanted heel section to accommodate cases with high condyles. Its tapered rear guide pins, smooth interior and special bronze alloy provide ease of function during flasking and de-flasking operations.
Shipping Wgt.: 3 lbs [1.4 Kg]
Unit Dimensions: 4" L x 3 3/4" W x 2 1/4" H
[10cm x 10cm x 6cm]

48X COM-A-PART FLASK
Round House Type for shade blending of resin teeth, or Processed Temporary Splints. Flask parts separate readily for ease of processing. Correct size for investing a full arch or a partial case. Supplied with insert and bottom knock-out for easy removal of restoration. Designed to resist warpage and distortion, the cast bronze fitted flask is constructed of solid bronze alloy. Supplied with locking wrench.
Shipping Wgt.: 7 lbs [3.2 Kg]
Unit Dimensions: 3 3/8" L x 2 1/4" W x 3 1/8" H
[9cm x 6cm x 8cm]
33 LITTLE GIANT
A Flask Press manufactured for pressing a single flask. Constructed of malleable/ductile iron, the Little Giant will provide years of trouble free service under normal pressing procedures. Inside dimensions: 5” wide x 4” max. height (13cm x 10cm). Order with 38A bench clamps to mount press on countertop.
Shipping Wgt.: 14 lbs [6.4 Kg]
Unit Dimensions: 7 3/4” L x 3 1/2” W x 7 3/8” H (20cm x 9cm x 19cm)

38B BIG BOY FLASK PRESS
A Heavy Duty Two Flask Press manufactured of malleable/ductile cast iron. With alloy steel shaft, grey iron handle and malleable/ductile iron pressure plate. Holes in frame allow for easy bench mounting, or 38A Clamps may be utilized for easy bench mounting and/or removal. Both 38 and 38B Big Boy Flask Presses are designed for the busy laboratory.
Shipping Wgt.: 24 lbs [10.9 Kg]
Unit Dimensions: 10” L x 4 1/2” W x 10” H (25cm x 11cm x 25cm)

38A BENCH CLAMPS
For use in mounting Models 33, 38, 38B presses to tabletop. Cast of aluminum alloy for rustproof protection. Shipped with mounting screws.
Shipping Wgt.: 1 lb [0.5 Kg]
Unit Dimensions: 1” H x 2 1/4” D x 4” L (3cm x 6cm x 10cm)

38 BIG BOY FLASK PRESS
A Heavy Duty Single Flask Press manufactured of malleable/ductile cast iron for durability and long wear, with alloy steel shaft, grey iron handle and malleable/ductile iron pressure plate. Holes in frame allow for easy bench mounting, or 38A Clamps may be utilized for easy bench mounting and/or removal. Big Boy Flask presses are designed for the busy laboratory.
Shipping Wgt.: 23 lbs [10.4 Kg]
Unit Dimensions: 10” L x 4 1/2” W x 8 1/2” H (25cm x 11cm x 22cm)

39 DELUXE MANUAL PRESS
This robust press is built by Handler to give the laboratory technician excellent hand pressing action when trial packing dentures. The Deluxe 2-Flasks Press is manufactured from 1” steel plate with a 1” diameter acme threaded center screw. The large chrome plated handle allows the technician to apply accurate pressure as dictated by the individual case. Provided in a durable baked finish with chrome plated steel supports, handle and center screw, this press will prove a welcome addition to your laboratory.
Shipping Wgt.: 24 lbs [10.9 Kg]
Unit Dimensions: 12” H x 6” W x 12” L (31cm x 15cm x 31cm)
44A ATLAS FLASK EJECTOR
Designed to easily eject poured models from No. 44 Atlas flasks with smooth mechanical action. Spring loaded side levers adjust to Upper or Lower Flask configuration with a quick movement of an indicating lever.
Initial insertion separates mid and lower flask sections; final insertion separates model from mid section.
Shipping Wgt.: 5 lbs [2.3 Kg]
Unit Dimensions: 6 1/2" W x 3 1/2" D x 6 1/2" H [16.5cm x 8.9cm x 16.5cm]

49A KING SIZE FLASK
Dentists and Technicians occasionally require an extra large size flask for a special purpose. The four piece bronze cast flask with substantial dimensions will be found suitable for the investing of large prosthetic appliances or several resin bridges, partials or full dentures at one time. The sections are slightly tapered to allow for easier de-flasking procedures without requiring a special device. Custom King-Sized Flasks available upon request.
Shipping Wgt.: 7 lbs [3.2 Kg]
Unit Dimensions: 3 3/8" L x 3 1/4" W x 2 13/16" D

35 SPRING FILLER
A bronze filler which provides flaked cases with compensatory spring action with the aid of two stainless steel springs. Used in Handler presses to provide compensatory spring action during curing of flaked dentures.
Shipping Wgt.: 1 lb [0.5 Kg]
Unit Dimensions: 3 1/2" W x 2 1/2" D x 1 1/2" H [8.9cm x 6.35cm x 3.8cm]

44D: BRONZE K.O.
Disc for 44 UPPER, LOWER, and Atlas GIANT Flasks. Also fits Varsity Flasks. 22D KO Discs available on special request for older 22C Handler Flasks.
Shipping Wgt.: 1 lb [0.5 Kg]
Unit Dimensions: 2 7/16" diameter x 3/16" H [7cm x 1cm]

47 K O EJECTOR
Designed for use in ejecting poured models from 22C Denture flasks, ONLY. Use in conjunction with any Handler Flask Press, the #47 easily ejects models from 22C flasks through smooth mechanical downward action.
Shipping Wgt.: 5 lbs [2.3 Kg]
Unit Dimensions: 5" W x 4 1/2" D x 2" H [12.7cm x 11.4cm x 5.1cm]

47D DE-FLASKING DISC
An aid designed to help locate denture teeth in a flask processed denture. The disc will help protect teeth during the deflasking procedure. Made of aluminum, the 47D can be used over and over again. For use in conventional type flasks. Packed 12 discs per box.
Shipping Wgt.: 1 lb [0.5 Kg]
Unit Dimensions: 3" L x 2 3/4" W x 3/8" H [8cm x 7cm x 1cm]
78-1ATLAS VARIABLE SPEED JUNIOR VIBRATOR
A three speed vibrator for use by the dentist or smaller laboratory. This is designed for compactness, longevity and intermittent use. Its 4” [10cm] diameter, removable, rubber covered table top makes it an ideal addition to any small lab work bench where a vibrator will be utilized for short periods to remove air from investment. Finished in a durable, baked coating. 115V/60Hz.
Shipping Wgt.: 6 lbs [2.7 Kg]
Unit Dimensions: 4 1/2” W x 4 1/2” D x 4” H [11cm x 11cm x 10cm]

Available in 220V/50Hz — Model 78-1E

78-RK ATLAS HEAVY DUTY TRI-SPEED VIBRATOR
DUAL FREQUENCY VARIABLE SPEED
The NEW Handler 78-RK Heavy Duty Vibrator is built for durability and rugged use. The newly designed 78-RK has two frequencies each with variable speed. The HIGH and LOW are variable to allow a technician to vibrate a mixing bowl or flask at the correct speed for the plaster, stone or viscous solution to de-bubble. The fully covered large rubber table is built to hold larger flasks and mixing bowls. The rubber top is removable for easy cleaning and replacement. Four soft rubber feet hold the 78-RK in place during the heaviest vibrating cycles. The unit is coated with a baked enamel finish. Built to last for many years. 115V/60Hz.
Shipping Weight: 11 lbs [5 Kg]
Unit Dimensions: 8” W x 6 1/2” D x 4 1/2” H

Available in 220V/50Hz — Model 78-RKE

72 ATLAS-APEX TYPE ARTICULATORS
Atlas articulators have been used by leading dental technicians and dentists for many years. The 72 is cast of non-rusting metal with a center support for durability and better plaster retention. Machined to produce maximum accuracy for this type articulator, the 72 Apex type articulator provides durable service.
Shipping Wgt.: 1 lb [0.5 Kg]
Unit Dimensions:
3 1/2” W x 5” D x 2 1/2” H [8.9cm x 12.7cm x 3.8cm]

SLICK-88/SPL-88
DRY TEFLON/SILICONE SPRAY
* THE ONLY INDUSTRY APPLICATION TO COMBINE TEFLON & SILICONE
SPL-88 is formulated from the two best wet/dry separating/lubricating agents: Silicone and Teflon. It is a non-flammable, environmentally safe dry spray. It is chemically bonded in a patented process to produce an extremely effective dry spray that is ideal for separating, protecting and/or lubricating.
Shipping Wgt.: 2 lb [1.0 Kg]
Unit Dimensions: 3” Diameter x 8” H [7.6cm x 20.3cm]
REPLACEMENT FILTERS FOR DUST COLLECTORS

NOTE: The fiberglass filters will not be effective for gypsum dust. They cannot be used for Aluminous Oxide (ALO). They are effective with Porcelain, metal, and acrylic dusts.

550-F/52-F
A 6” X 6” x 2” pleated cartridge filter that is reusable and replaceable, this filter will collect dust particles of .5 microns and larger. The filter should be cleaned regularly by removing from the unit and tapping it out over a waste container and should be replaced every 6 - 9 months. Order 550-F for Models 550 and 575
Order 52-F for Models 52CSU and 52CFI
Shipping Weight: 1 lb [0.5Kg]
Unit Dimension: 6” x 6”

62-IIDF **NEW!**
Shipping Weight: 1 lb [0.5Kg]
Unit Dimension: 6” x 6”

62-IICF
Charcoal filter for model 62-II to aid in the removal of acrylic monomer odors
Shipping Wgt: 1 lb [0.5Kg]
Unit Dimensions: 9 ¾” x 4 ¼” x 1 ½”

62 DF
Set of 6 disposable filters for model 62 Super Sucker
Shipping Wgt: 1 lb [0.5Kg]

62-PF
Polyester filter for model 62 Super Sucker
Shipping Wgt: 1 lb [0.5Kg]

62 CF
Charcoal filter for model 62 to aid in the removal of acrylic monomer odors
Shipping Wgt: 1 lb [0.5Kg]
Unit Dimensions: 12 ¾” x 6 ¼” x 1 3/4”

## DUST COLLECTORS ACCESSORIES

### 210T IN-DRAWER SUCTION

210T In-Drawer Suction Attachment is designed to be placed in the center drawer of a technicians bench and connect to a suction hose behind the drawer. Complete with clear acrylic Sta-Kleen shield, this delivers suction to users of handpieces while protecting technician from grinding and polishing dusts created by the handpiece. Shipped in a durable, baked finish warm gray. Please specify if other color required.

*Shipping Wgt.: 5 lbs [2.3 Kg]*

*Unit Dimensions: 6 1/8” W x 15” D (16cm x 38cm) with rear 1 1/2” (4cm) oval suction inlet. Height: 1 3/4” (4cm)*

### 66C-1 GRIND-N-TRAY SINGLE SHIELD

A single shielded tray for use in collecting dusts created by handpiece grinding. This tray is designed to fit comfortably into existing bench drawers and contains a bottom suction hole with cut-off. Its clear acrylic shield flips up to provide eye protection while channeling dusts into the opening of the tray. Finished in a durable, baked coating.

*Shipping Wgt.: 4 lb [1.8 Kg]*

*Unit Dimensions: 10” W x 6” D x 1 1/2” H (25cm x 15cm x 4cm)*

**Available with 2 acrylic shields - Model 66C-2**

### 210BG BLAST GATE

For mounting on vertical riser of metal or wooden benches. Sliding cut-off opens and closes passageway to dust collector. Flanged on both sides for easy attachment to 3” (7.6cm) flexhose on rear side, and insertion of 87210 fishmouth on front side. Finished in baked, durable coating.

*Shipping Wgt.: 4 lbs [1.8 Kg]*

*Unit Dimensions: 6 3/4” L x 3 3/4” W [17cm x 10cm]*

### 66C-53 FLANGE

A 3” (7.6cm) diameter aluminum flange for mounting onto splash hoods or bench risers to provide a rigid connection for attachment of flexible ducting.

*Shipping Wgt.: 1 lb [0.5 Kg]*

*Unit Dimensions: 4” L x 4” W x 1 1/2” H [10cm x 10cm x 4cm]*

### 87210 FISHMOUTH

This fishmouth is designed for use on the bench top. Supplied with a 5 1/2” x 3” (14cm x 8cm) diameter rear duct, the 87210 may be connected to a dust collector via flexible ducting or directly into a 210BG Blast Gate which is mounted on the vertical riser of a laboratory bench. Manufactured of Quality Resin which is impervious to germicides, this fishmouth is contoured for use with a Lathe or a handpiece.

*Shipping Wgt.: 3 lbs [1.4 Kg]*

*Unit Dimensions: 6 1/4” H x 12 3/4” D x 6 3/4” W [18cm x 30cm x 17cm]*

### 87 FISHMOUTH WITH BLAST GATE

For use on the bench top to assist in the collection of grinding and polishing debris while connected to a dust collector. The fishmouth is a widemouthed type hood which directs debris created by lathe or handpiece operations into a dust collector. Manufactured of Quality Resin which is impervious to germicides, the 87 is fitted with its own 3” (7.6cm) diameter suction cut-off. The fishmouth is contoured for use with a Lathe or a handpiece.

*Shipping Wgt.: 3 lbs [1.4 Kg]*

*Unit Dimensions: 6 1/4” H x 12 3/4” D x 6 3/4” W [18cm x 30cm x 17cm]*

### 66C-1 GRIND-N-TRAY SINGLE SHIELD

A single shielded tray for use in collecting dusts created by handpiece grinding. This tray is designed to fit comfortably into existing bench drawers and contains a bottom suction hole with cut-off. Its clear acrylic shield flips up to provide eye protection while channeling dusts into the opening of the tray. Finished in a durable, baked coating.

*Shipping Wgt.: 4 lb [1.8 Kg]*

*Unit Dimensions: 10” W x 6” D x 1 1/2” H (25cm x 15cm x 4cm)*

**Available with 2 acrylic shields - Model 66C-2**

### 87210 FISHMOUTH

This fishmouth is designed for use on the bench top. Supplied with a 5 1/2” x 3” (14cm x 8cm) diameter rear duct, the 87210 may be connected to a dust collector via flexible ducting or directly into a 210BG Blast Gate which is mounted on the vertical riser of a laboratory bench. Manufactured of Quality Resin which is impervious to germicides, this fishmouth is contoured for use with a Lathe or a handpiece.

*Shipping Wgt.: 3 lbs [1.4 Kg]*

*Unit Dimensions: 6 1/4” H x 12 3/4” D x 6 3/4” W [18cm x 30cm x 17cm]*

### 87 FISHMOUTH WITH BLAST GATE

For use on the bench top to assist in the collection of grinding and polishing debris while connected to a dust collector. The fishmouth is a widemouthed type hood which directs debris created by lathe or handpiece operations into a dust collector. Manufactured of Quality Resin which is impervious to germicides, the 87 is fitted with its own 3” (7.6cm) diameter suction cut-off. The fishmouth is contoured for use with a Lathe or a handpiece.

*Shipping Wgt.: 3 lbs [1.4 Kg]*

*Unit Dimensions: 6 1/4” H x 12 3/4” D x 6 3/4” W [18cm x 30cm x 17cm]*
MODEL TRIMMER ACCESSORIES

MODEL TRIMMER REPLACEMENT WHEELS
Handler now provides reversible, reinforced CARBO-DENT WHEELS for all its model trimmers. Handler model trimmer wheels fit most other makes of model trimmer; call us for information.

32SHLD SAFETY SHIELD
Hander designed the 32SHLD to provide adjustable protection against flying debris, a must for OSHA compliance. A clear acrylic shield is attached to a 13" adjustable arm; a strong magnetic base adheres to any magnetic surface, and can be used at any workstation where dust and debris are present.

For Handler Models 31 and 31X and most other model trimmers with 10" diameter wheel
Standard Coarse Replacement Wheel - Order 31A-C
Shipping Wgt.: 1 lb [0.5 Kg]

For Handler Models 32, 32X and 32-3/4 and most other model trimmers with 12" diameter wheel
Standard Coarse Replacement Wheel - Order 32A-C
Shipping Wgt.: 1 lb [0.5 Kg]

32-07GK GASKET
Replacement gasket for all Handler model trimmers; cut-to-fit gasket ships complete with adhesive material. Shipping Wgt.: 1 lb [0.5 Kg]

Diamond Wheels
32KD (12") - 31KD (10")
Available in 10" and 12" diameters, Kohinoor diamond wheels provide fast, balanced, quiet cutting of gypsum lab models. Designed for the busy laboratory that trims thousands of models, Handler's diamond model trimmer wheel includes a 3 year warranty.
31KD – for Handler models 31 and 31X and most other trimmers with 10" diameter wheels
32KD – for Handler models 32, 32X, 32-3/4 and most other trimmers with 12" diameter wheels

Starter kit of coated abrasive discs, plastic back-up plate and compensating washer
31Y - for dry trimmers with 10" diameter wheels (6 abrasive discs)
32Y - for dry trimmers with 12" diameter wheels (4 abrasive discs)

299 PLASTER TRAP
A plaster/solids trap designed to settle out and entrap solids such as plaster, stone, etc. created in dental laboratory. Made of water grade cast iron with stainless steel insert and cover, this plaster trap will meet local plumbing codes and help keep your drains free of solid waste buildup. Built to provide years of service. Top disconnects for easy removal of insert. NOTE: UPC LISTED.
Shipping Wgt.: 35 lbs [15.9 Kg] Unit Dimensions: 11" diameter x 12" high [27.9 cm x 30.5 cm]
Inside Diameter: 8.5" [21.6 cm]
236FH-2 FUME HOOD
Handler has designed a hood with 600 CFM suction capacity to remove fumes and odors from laboratory processing. The fume hood is mounted onto a studded wall directly above the fume source and the exhaust ducted to a suitable location outside your building. Its size makes it convenient to install in most laboratories; it is constructed of heavy gauge sheet steel and powder coated in a durable, baked finish.
Shipping Wgt. 125 lbs (56.7 Kg)
Unit Dimensions: 42"W x 20"D x 39 3/8"H

74CW/235W CASTING WELL
A casting well made of heavy gauge sheet steel with steel and fiberboard base, finished in a durable, baked coating.
Shipping Wgt.: 51 lbs (23.1 Kg)
Unit dimensions: Well: 19" Diameter x 14 ¼" high, Base: 19 ½" x 19 ½"
Model 74CW – with hinged cover 20 7/8" x 20 7/8"
Model 235W – for installation inside metal benches

81C PLASTER BIN
A three compartment plaster bin which may be hung on the wall or placed on a benchtop. The 81C is manufactured of heavy gauge sheet steel and finished in a durable, baked warm-gray finish. Each compartment of this plaster bin is built to hold 25 lbs (11.3 Kg) of stone or plaster. Special design prevents gypsums from pushing out from lower access door when plaster bin is being filled.
Shipping Wgt.: 23 lbs (10.4 Kg)
Unit Dimensions:
21" W x 10" D x 18" H (53cm x 25cm x 46cm)
Available in Stainless Steel - Model 81C-SS

225BLK LAB CHAIR
Ergonomically designed black lab chair designed for comfort and durability. Stable reinforced base with heavy duty stationary glides; contoured, tilting seat with easy adjustment for height and back.
Shipping Wgt.: 30 lbs (13.6 Kg)
Unit dimensions:
Seat: 18" W x 17" D x 1 ½" Thick
Back: 17" W x 12" H x 1" Thick
Height: 16 ½" – 21 ½"

62FS FOOT SWITCH
Provides on/off continuous action; push to turn on, push it again when you want to turn it off. Comes complete with 8 foot cord. Perfect for use with equipment items up to ½ HP, 10 amps, particularly Handler dust collector models 62, 62-II and 60U.

74 EXAC-U-CAST
A Centrifugal Casting Machine designed for use in casting precious and non-precious metals. The Exac-U-Cast features a hardened steel center shaft which is mounted between two double shielded ball bearings. A large centrifugal spring powers the heavy duty casting arm during casting operations. Unit sold complete with 1 3/4" [4.4cm] stainless casting ring, 1 3/4" [4.4cm] rubber sprue former, three casting ring cradles for popular size casting rings, flask tongs and assortment of DLA Hollow Plastic Sprues.
Shipping Wgt.: 18 lbs (8.2 Kg)
Unit Dimensions: 16 1/2" Diameter x 10 1/2" high [24cm x 26.7cm]
218 LEVER BLOW GUN  
Metal, nickel plated blow gun activated by depressing lever located on top of gun. Connects to standard 1/4” [0.6cm] NPT air line.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Dimensions: 4 3/16” L x 2” H x 1 1/8” W [11cm x 5cm x 3cm]

217 PUSH BUTTON BLOW GUN  
Metal, nickel plated blow gun activated by depressing push button on top of gun. Connects to standard 1/4” [0.6cm] NPT air line.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Dimensions: 3 1/2” L x 1 5/8” H x 13/16” W [9cm x 4cm x 1cm]

216 RUBBER BLOW GUN  
A rubber tipped air blowgun for tabletop and bench use. Connects to a standard 1/4” [0.6cm] NPT air and activates with the bending movement of the rubber nozzle.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Dimensions: 3 1/16” L x 5/8” W [8cm x 2cm]

219 RUBBER AIR HOSE  
Rubber covered braided air hose. Five feet in length with 1/4” [0.6cm] NPT fittings both sides.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Dimensions: 1/2” Diameter x 60” Long [1.3cm x 152.5cm]

220 NYLON COIL AIR HOSE  
Coiled nylon air hose with 1/4” [0.6cm] NPT swivel fittings both ends. 10 feet (3 meters) in length with coil extended fully.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Dimensions: 6” Diameter x 9” Wide (compressed) [15.2cm x 22.9cm]

210-0 BENCH MOUNTED FLANGE  
A finely finished chrome plated cast bronze 3/8” [1cm] NPT fitting for mounting single air, gas or water valves.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Dimensions: 1 13/16” W x 2 3/4” L [5cm x 7cm]

210-90 TURRET  
A 90 degree turret for mounting two air or gas valves at a 90 degree angle to tabletop. 3/8” [1cm] NPT pipe connection.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Dimensions: 3” H x 2” Diameter [7.6cm x 5.1cm]

210-CF CHROME CAST FLANGE  
Designed for use with 3/8” NPT air or gas valves, this chrome plate, cast bronze flange provides an aesthetic positive connection to all 3/8” air or gas connections.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Unit Dimensions: 2 1/2” Diameter x 2 1/4” Deep [6.40cm x 5.70cm]

210G GAS VALVE  
Tapered gas valve with positive lever shut-off control and 3/8” [1cm] NPT pipe connector. Chrome plated with rear chrome backplate.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Dimensions: 3/8” W x 11/16” L [1cm x 2cm]

221 RAPID CONNECT-DISCONNECT  
Air coupler designed for rapid connection or disconnection of 1/4” [0.6cm] NPT air line. Zinc plated for extended service.  
Shipping Wgt.: 1 lb [0.5 Kg]  
Dimensions: 2 7/8” L x 3/4” W [7cm x 2cm]
**PARTS & ACCESSORIES**

**PROCESSING EQUIPMENT**

- **210SS WORK SURFACE**
  Sturdy stainless steel work surface protector.

- **235CC CASTING WELL COVER**
  Increase your work space with a stainless steel cover over your casting well and keep your well covered when casting metals for added safety.

- **231WC WASTE CHUTE INSERT**
  Stainless steel waste chute insert helps direct the waste flow into the trash receptacle keeping the environment cleaner.

- **231HF HANDS-FREE WATER CONTROL**
  Keep your hands free of germs by using a kick plate to activate water flow in the lab.

- **Ergonomic Arm Rest**
  Comfortable support to reduce fatigue.

- **EMERGENCY EYE WASH STATION OPTIONS**
  OSHA approved Faucet Mounted Emergency Eye Wash Station.

CORNER WORK STATION

Model 213CWS
PTL-215SP is engineered to provide affordable and durable functionality with style and performance. Standard with the PTL-215SP is a full 24” deep work surface free of obstacles for maximum work area and a 16” x 12” work surface protector. The list of standard components is long.

**NEW 223LED**

- Energy efficient LED bench light consumes less than ¼ Amp of power while providing 1800 lumens of light directly to the work area
- 30” Heavy Duty Swivel LED Light with 18 high power bright white LEDs
- Manufactured in durable aluminum housing with built in ON/OFF rocker switch and acrylic lens
- Zinc alloy end caps allow light to swivel 180 degrees
- Comes with the 24 Volt DC compact power supply including AC in & DC out cables & connector, along with nickel plated bench mounts and hardware for installation
- Available factory installed on any Handler bench or work station with shelves

**The PTL-215SP Features:**

- All 18 gauge welded steel construction with an oven cured powder coated painted finish
- Spacious 6” riser or chase to run air, gas and electric lines
- Totally enclosed, powerful and quiet 62-II Dust Collector pre-wired for ease of operation
- Double tier shelf to hold cases conveniently
- Six outlet pre wired power strip
- Gas valve
- Retractable air line with pressure regulator and blow gun
- Removable 16” x 12” stainless steel work surface protector
- Laboratory grade solid, smooth Resistop® work surface that resist stain and scratches
- Two suction inlet options
  - Bench top 3” suction inlet with blast gate
  - In drawer suction complete with protective acrylic shield and padded comfort arm rest
- Four drawers for storing tools and equipment
- Easy set-up and assembly
- Dimensions: 42”W x 30”D x 62”H work surface

The latest installment of the new HANDLER MFG Series of comfortable space maximizing lab technician work stations.
LABORATORY WORK BENCHES

Handler’s work stations and cabinets are built of heavy gauge sheet steel and powder coated for longevity and durability.

211 TECH-RITE BENCH
Five drawer technician’s bench with resistop. Resistop is similar to man made slate. Built of heavy gauge sheet steel with heavy gauge tubular steel legs, the 211 is shipped complete with four legs with leg levelers, duplex electrical outlet, suction inlet and knock-outs for air and gas valves. This bench has an oven-cured, powder-coated finish and Resistop© Countertops. *NOTE: Gas and air valves as shown are at additional charge.
Shipping Wgt.: 170 lbs. [77.1 Kg]
Unit Dimensions: 42” W x 24 1/2” D x 32” to work surface [107cm x 62cm x 81cm]
with 42” W x 6 1/2” D x 6” H
Riser [107cm x 17cm x 15cm], mounted rear

213 CERAMIST BENCH
This seven drawer bench is designed particularly for the ceramist. In addition to the two larger side drawers which will accommodate large porcelain jars, its side cabinet contains a hinged door and compartment for a vacuum pump or other accessories. The side cabinet is shipped for assembly on the right side of the bench. Built of heavy gauge sheet steel, the Tech-Rite Ceramist Bench is shipped complete with legs, duplex electrical receptacle, suction inlet and knock-outs for air and gas valves. This bench has an oven-cured, powder-coated finish and Resistop© Countertops.
Specify placement of side cabinet - LEFT or RIGHT.
Shipping Wgt.: 270 lbs. [122.4 Kg]
Unit Dimensions: 58” W x 24 1/2” D x 32” to work surface [147cm x 62cm x 81cm].
Bench contains 58” W x 6 1/2” D x 6” H
Riser [147cm x 17cm x 15.2] mounted rear

215SP SINGLE PEDESTAL BENCH
Five drawer single technician’s bench with Resistop tops. Bench is supported by a 17” deep x 42” wide [28cm x 107cm] single pedestal. The 215SP contains a 42” wide x 6 1/2” deep x 6” high riser [107cm x 17cm x 15cm] mounted rear with one duplex receptacle, suction inlet and knock outs for air and gas valves in the vertical riser. This bench must be secured to the wall of the laboratory or installed to the floor as a free standing bench. May be combined with additional benches to form a free standing or wall mounted island of benches. Constructed of heavy gauge sheet steel with an oven-cured, powder-coated finish and Resistop© Countertops.
Shipping Wgt.: 225 lbs. [102 Kg]
Unit Dimensions: 42” W x 30 1/2” D x 32” to work surface [107cm x 77cm x 81cm]
215WS PEDESTAL BENCH
A two technician pedestal bench containing five drawers for each technician. Benches are mounted face to face supported by pedestal. Bench also includes a 60U dust collector for two technicians, two fishmouths, flexible ducting, clamps, blastgates and two lighted remote switches mounted on vertical risers.
Supplied with Resistop© tops, and an oven-cured, powder-coated finish. *NOTE: Gas and air valves as shown are at additional charge.
Shipping Wgt.: 450 lbs. [204.1 Kg]
Unit Dimensions: 42” W x 49” D x 32” to work surface [107cm x 125cm x 81cm]
Riser is 42”W x 13” D x 6” H [107cm x 33cm x 15cm]
Available without dust collector - Model 215

800 DEXTERITY 2000 WORKSTATION
Handler has developed a new workstation to satisfy the ergonomic requirements of the laboratory technicians. The Dexterity 2000 Workstation is a modern, practically designed bench which is sturdy, comfortable, and durable. Workstations available in 42”, 48” and 60” wide. Varying widths are available on special order.

800
Mechanically Adjustable Height Bench 42”W X 30”D Steel construction with laminated top workstation. 12”D X 30”W shelf, dust collector, light, two duplex outlets and knock outs for gas and air.
Shipping Wgt: 500 lbs

801
Mechanically adjustable height bench 48”W x 30”D with laminated workstation top. 12”D X 30”W shelf, dust collector, light, two duplex outlets and knock outs for gas and air. Shipping Wgt: 525 lbs

802
Mechanically adjustable height bench 60”W x 30”D with laminated workstation top. 12”D X 30”W shelf, dust collector, light, two duplex outlets and knock outs for gas and air. Shipping Wgt: 575 lbs

P901-04: EXTRA SHELF, 12”D X 30” W SOLD SEPARATELY
P800-1: SET OF THREE DRAWERS SOLD SEPARATELY

311 MASTER TECHNICIAN BENCH
The ultimate bench for the accomplished technician, designed to provide maximum work space for supervision and teaching. This bench contains 13 drawers, a 36” [91cm] electrical strip, air and gas valves, and a 3” [7.6cm] suction inlet with blastgate. This bench is constructed of heavy gauge steel with an oven cured, powder coated finish and includes a Resistop work surface. A 6 ½” deep x 6” high [17cm x 15cm] vertical riser is mounted in the rear of the bench.
Shipping Wgt.: 350 lbs. [158.7Kg]
Unit Dimensions: 74” W x 24 ½” D x 32” H to work surface [188cm x 62cm x 81cm]
231 PLASTER BENCH
A seven foot bench built for use as a plaster bench. Bench contains one 35” [89cm] double door cabinet, one 24” [61cm] single door cabinet and one 24” [61cm] four drawer cabinet combined. Built-in 16” x 12” x 8” deep Resistop© sink with faucet, and adjacent plaster (waste) chute. Bench constructed of heavy gauge sheet steel with an oven-cured, powder-coated finish with Resistop© Countertop and backsplash.
Shipping Wgt.: 475 lbs. [215.4 kg]
Dimensions: 83 3/8” W x 24 1/2” D x 36 3/4” H to work surface [213cm x 62cm x 109cm]
Available with 6” riser at additional cost.

235 CASTING/SOLDERING BENCH
A seven foot long bench designed for casting and soldering. This bench consists of one 35” [90cm] double door cabinet, one 24” [61cm] single door cabinet and one 24” [61cm] single door cabinet with tool area insulated for placement of torches and tools. This cabinet’s work surface is covered with Resistop material and contains a cut-out with a 19” Diameter x 14 1/2” High casting well.
Available at additional cost with 6” [15cm] high riser in lieu of backsplash making bench 29” [73cm] in depth. Constructed of heavy gauge sheet steel with an oven-cured, powder-coated finish.
Shipping Wgt.: 460 lbs. [208.6 kg]
Dimensions: 83 3/8” W x 24 1/2” D x 36 3/4” H to work surface [213cm x 62cm x 109cm]

235CS CASTING/SOLDERING BENCH
All the benefits of the seven foot long 235 Casting & Soldering bench in a compact, ergonomic design. This cabinet’s work surface is covered with Resistop material and contains a cut-out with a 19” Diameter x 14 1/2” High casting well. The unit comes complete with a cutout and casting well, 3 drawers for storage, knock-outs for air & gas connection, a 6” riser and two duplex outlets. Available with a backsplash in place of the 6” riser; bench depth will be 23”.
Shipping Weight: 340 lbs. [155 kg]
Dimensions: 48” W x 29” D x 36 3/4” H [122cm x 74cm x 109cm]
SCALABLE LABORATORY CABINETS & BENCHES

241 DOUBLE DOOR CABINET
A 35” [90cm] wide double door cabinet built of heavy gauge sheet steel and covered with Resistop work surface. Full size doors provide complete access to enclosed area. Cabinets and doors finished in an oven-cured, powder-coated finish. Shipped with 6” Backsplash, may be ordered with 6” Riser option at additional cost.
Shipping Wgt.: 185 lbs. [83.9 kg]
Dimensions: 35” W x 23 3/4” D x 36 3/4” H [89cm x 58cm x 92cm]

243 SINGLE DOOR CABINET
A 24” [61cm] wide single door cabinet built of heavy gauge sheet steel with Resistop top. Full sized door allows complete access to inside of cabinet. Shipped with 6” Backsplash, may be ordered with 6” Riser option at additional cost.
Shipping Wgt.: 130 lbs. [59 kg]
Dimensions: 24 1/8” W x 23 3/4” D x 36 3/4” H [61cm x 63cm x 92cm]

245 SINGLE DOOR CABINET
An 18” [46cm] wide single door cabinet constructed of heavy gauge sheet steel with Resistop work surface. Complete access to cabinet interior is afforded by full size door. Shipped with 6” Backsplash, may be ordered with 6” Riser option at additional cost. Cabinet finished in an oven-cured, powder-coated finish.
Shipping Wgt.: 115 lbs. [52.2 kg]
Dimensions: 18 1/8” W x 23 3/4” D x 36 3/4” H [46cm x 76cm x 92cm]

247 FOUR DRAWER CABINET
This four drawer cabinet is manufactured of heavy gauge sheet steel and finished in a durable, baked coating. Each drawer is equal in size. Work surface covered in Resistop material. Shipped with 6” Backsplash, may be ordered with 6” Riser option at additional cost.
Shipping Wgt.: 160 lbs. [72.6 kg]
Dimensions: 24 1/8” W x 23 3/4” D x 36 3/4” H [61cm x 58cm x 92cm]

251 CORNER CABINET
A single door cabinet designed to be placed in a corner and abut modular benches on either side. Constructed of heavy gauge sheet steel and finished in an oven-cured, powder-coated finish. Shipped with 6” Backsplash, may be ordered with 6” Riser option at additional cost.
Shipping Wgt.: 190 lbs. [86.2 kg]
Dimensions:
Wall side - 46” [89cm], abutment side - 23 1/2” [60cm],
Door side - 16 1/4” [46cm],
Height - 36 3/4” [93cm]

247DL - In-drawer liner/separator available to hold plaster and stone.
256 PACKING BENCH
A packing bench utilized for general lab procedures. Manufactured of heavy gauge sheet steel with an oven-cured, powder-coated finish, this bench has a myriad of uses in the laboratory.
It is supplied with a Resistop work surface, a 6” vertical riser and two duplex electrical receptacles.
Shipping Wgt.: 145 lbs. [65.8 kg]
Dimensions: 42” W x 24 1/2” D x 32” H to work surface [107cm x 62cm x 81cm]

261 BOILOUT CABINET
Boilout bench is constructed of heavy gauge sheet steel with added structural supports to insure the secure containment of your boilout unit. Bench contains two front doors with louvers to allow for proper air circulation throughout heated boilout unit. The piece is coated in a durable, baked finish.
Shipped with 6” Backsplash, may be ordered with 6” Riser option at additional cost.
Shipping Wgt.: 215 lbs [97.5 Kg]
Dimensions: 35” W x 23 3/4” D x 36 3/4” H [89cm x 58cm x 92cm]
NOTE: Shown with 26102 Boilout/Curing unit—NOT INCLUDED.
Specify cut out size for Boil-Out Unit.
Contact Handler prior to ordering.

275 WALL CABINET
A double sliding door cabinet built to be mounted on the wall. Cabinet manufactured of heavy gauge sheet steel with adjustable single interior shelf. Finished in an oven-cured, powder-coated finish with glide-rite doors.
NOTE: Additional shelves available at additional cost.
Shipping Wgt.: 100 lbs [45.4 Kg]
Dimensions: 36” W x 10” D x 30” H [91cm x 25cm x 76cm]

245TILT PLASTER STORAGE CABINET
This 18” [46cm] wide cabinet makes it convenient and ergonomic to store heavy plaster or stone. The 245TILT is built of heavy gauge sheet steel with Resistop work surface. The door tilts out from the top allowing the user to easily fill up to 50 pounds of plaster or stone. Cabinet is finished in an oven-cured, powder-coated finish. Shipped complete with 6” Backsplash, may be ordered with 6” Riser option at additional cost. Multiple cabinets can be placed side by side for various types of plaster or stone storage.
Shipping Wgt.: 120 lbs. [54.5 kg]
Dimensions: 18” W x 23 3/4” D x 36 3/4” H [46cm x 58cm x 92cm]

Shown with 26102 Dual Tank Curing System
 Contact Handler for Custom Shelves designed to meet your needs.

222 DOUBLE SIDE WORK SHELF
Designed for placement on top of riser where benches are placed face to face. The shelf is constructed of heavy sheet steel and perforated steel. Built to hold case pans and finished in a baked, durable coating. Specify color when ordering.
Shipping Wgt.: 75 lbs [34 Kg]
Dimensions: 42” W x 15” D x 12” H
[107cm x 38cm x 30cm]

223 SINGLE SIDE WORK SHELF
Designed for placement on top of single position work benches. Constructed of heavy sheet steel and perforated steel, the shelf attaches to riser. Finished in a durable coating. Specify color when ordering.
Shipping Wgt.: 55 lbs. [24.9 kg]
Dimensions: 42” W x 7 1/2” D x 12” H
[107cm x 19cm x 30cm]

213SDT DOUBLE TIER SINGLE SIDE
Double tier work shelf for ceramist bench, constructed of heavy sheet steel and perforated steel, attaches to riser. Built to hold case pans. Finished in a durable baked coating. NOTE: Contact Handler for pricing on special size work shelves of different lengths and widths. Specify color when ordering.
Shipping Wgt.: 80 lbs. [36.3 kg]
Dimensions: 58” W x 7 1/2” S x 24 “ H
[147cm x 19cm x 61cm]

222DT DOUBLE SIDE/DOUBLE TIER WORK SHELF
Designed for placement on top of riser where benches are placed face to face. The shelf is constructed of heavy sheet steel and perforated steel. Built to hold case pans and finished in a baked, durable coating. Second shelf doubles work area. Specify color when ordering.
Shipping Wgt.: 95 lbs [34 Kg]
Dimensions: 42” W x 15” D x 24” H
[107cm x 38cm x 61cm]

223DT DOUBLE TIER SINGLE SIDE
Designed for placement on top of single position work benches. Constructed of heavy sheet steel and perforated steel, the shelf attaches to riser. Finished in a durable coating. Second tier doubles workshelf area. Specify color when ordering.
Shipping Wgt.: 75 lbs. [34 kg]
Dimensions: 42” W x 7 1/2” D x 24” H
[107cm x 19cm x 61cm]

213DT DOUBLE TIER DOUBLE SIDE
Designed for placement on top of riser where benches are placed face to face. The shelf is constructed of heavy sheet steel and perforated steel. Built to hold case pans and finished in a baked, durable coating. Specify color when ordering.
Shipping Wgt.: 90 lbs
Dimensions: 58” W x 15” D x 24” H

No project is too small or too big

Handler’s benches and cabinetry can withstand the rigors of the lab environment and are manufactured of 18 gauge steel with long-lasting Resistop© work surface.

Handler's solutions are the most affordable solutions in the industry. The staff at Handler has the experience and know how for efficient lab work flow and can customize almost any solutions to meet requirements.

Handler manufactures its products in the USA and offers turn around times that are very reasonable.

Handler offers a variety of colors and styles to meet your needs.

Handler provides the necessary accessories such as gas and air valves, boil out and curing units, casting areas, plaster work areas, polishing units, central or decentralized dust collection systems, hands free faucets and sinks, comfortable seating, shelves, lighting, plaster bins, wall mounted storage and more.
